

The Board has again reviewed the complexity of the Herd District Boundaries throughout the County and has determined, by resolution, that the time has come to simplify and unify the status of Herd Districts in Canyon County. In making this determination the Board has found the following:

1. A survey map attached hereto, prepared by the Planning and Zoning Administrator designates the three small areas within the County which remain open range.
2. That map shows that over 95% of the land within the County is now in Herd District status.
3. Through the years confusion has existed because of overlapping boundary lines and indefinite District boundary descriptions.
4. Canyon County has reached the stage of urban development which destroys the original purpose and usefulness of the concept of open range.
5. The mobility of our citizens has increased to the point at which it becomes necessary that Herd District status exist throughout the County. Therefore,

IT IS HEREBY ORDERED by the Board of Canyon County Commissioners on this 10 day of December, 1982, that a Herd District be established in the three remaining open range areas in Canyon County as shown on the attached survey map (marked in black), to the end that the entire land area of Canyon County be placed in Herd District status.
