## Overview
Students will make an accordion book. It will include descriptions and pictures of noxious weeds.

## Goal(s) & Objective(s)
Students will be able to research and identify characteristics of noxious weeds.

## Materials
1. Scissors
2. Glue or glue sticks
3. Card stock for the covers, the same size as the folded text block, two per student
4. Markers/Colored Pencils
5. Bone folder or wooden craft sticks

## Teaching Activities: Instructional Approaches/Strategies

### Opening/Introduction:
1. Explain accordion activity, and what is expected.
2. Go to computer lab and research a specific noxious weeds for booklet.

### Procedures

#### Create Accordion Booklet as follows:
Fold paper in half and crease the edge using craft sticks.

Fold one end to meet the center fold, creasing the edge of the paper.

Now reverse the direction of the fold.
Fold the new fold up to meet the center fold.

Fold the end to the center fold.

Repeat with the other end fold.

Now you will have an 8 page accordion fold book.
Glue the card stock covers to the first and the last page of the text block.
Show students an example of the book they will be making.

Demonstrate how to fold the accordion section of the book and how to glue the two sections together.

Create a front and back cover for the book.

Design the front cover to include the words “Noxious Weeds”

Include student name on the front of the book.

Each page of the book should contain the following information:

- Common name of weed
- Sketched or printed picture of weed
- 3 interesting facts about the weed

Assessment: Check students knowledge by having them share their accordion weed books with a partner. They should be able to tell about the weed while their partner follows along in the book.

Website for research of noxious weeds found in Idaho:

http://www.idahoag.us/Categories/PlantsInsects/NoxiousWeeds/watchlist.php
http://www.idahorange.org
Http://www.uidaho.edu/range

Background:

The teacher should be familiar with the 57 noxious weeds in Idaho and should have an understanding about how destructive they are. Students will encounter a lot of unfamiliar vocabulary so the teacher should be prepared to talk about word meanings. Refer to Backpack Guide to Idaho Range Plants by Juley Hankins from the University of Idaho.

Possible steps to speed up the process of the research would be to have all computers bookmarked so students could go right to the site. Having pictures already printed for students to use in their books could save some time, too. If there are any samples of noxious weeds that can be brought into the classroom, students could experience a more hands on approach to the weeds. Hard copies of the plant information would work well if
you have limited numbers of computers. If you have a large class, it is helpful to use student assistants who already know how to make the accordion books. Although folding seems like a simple task, even eighth graders can get confused and frustrated.

Examples of words to define:

- Rangeland
- Noxious
- Life cycle
- Habitat
- Root systems
Rubric: Noxious Weeds Accordion Book
