

## Rangeland Herbivores

**Duration:** Varies by student(s)

**Group Size:** Limited by number of computers

**Setting:** Classroom with computers or computer lab

**Activity Authors:** Adapted from a high school sample exercise on Biology – “MAMMANS” ON THE INTERNET created by John Wollhaupter and Jerid Knuttilla of Irondale High School, Minnesota. Uses content from the Animal Diversity Web created by the University of Michigan Museum of Zoology.

The purpose of this activity is to provide students with an opportunity to utilize websites to learn more about rangeland animals

### Goals:

Students will:

- Examine a website to learn more about rangeland herbivores

### Materials:

- Computers with internet access
- Handout: “Rangeland Herbivores”

### Procedures:

Hand out the worksheet, “Rangeland Herbivores.”

1. Have students work individually or in small groups to answer the questions on the worksheet by going through the different parts of the website.
