

## Rangeland Animal Habitat

### What is a Habitat:

- Biotic:
- Climatic:
- Edaphic:

### 4 Basic Elements of a Habitat:

- **Food:**
  - Energy:
  - Nutrients:
  - Minerals:
  - Cellulose is the most abundant source of \_\_\_\_\_ on rangelands.
  - **3 different types of animals (and how much do they eat?):**
    - Concentrate Selector:
    - Ruminants:
    - Hind-gut Fermenters:
- **Water:**
  - Water requirements vary for animals depending on the \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_.
  - Moisture content of forage:
  - Constructed water sources provide wildlife \_\_\_\_\_ to water.
- **Cover:**
  - Shade:
  - Shelter:
  - Visual Obstruction:
- **Space:**
  - Breeding and nesting
  - Home Range
  - Social Intolerance
  - Disease Transmission
  - Fences
