

RANGELAND FIREFIGHTER

Fire on rangeland can start by lightning (natural cause) or by humans. Firefighters risk their lives to protect us when fires start. Plants are food for animals to eat. In a fire, plants are fuel. Lets travel with Sage to the summer rangeland and learn more about wildland fires.

Fill in the blank using the fire triangle.

Fire is the result of a _____
source using _____ to burn
_____ on rangeland.

If you remove one of these (heat, oxygen, or fuel), the fire will die out.

What can you do to prevent wildfires?

Cross out the items below that are NOT fuel for fires.

RAIN GRASS SHRUBS
ROADS WILDFLOWERS
WIRE LITTER
