

# RANGELAND FIREFIGHTER

Fire on rangeland can start by lightning (natural cause) or by humans. Firefighters risk their lives to protect us when fires start. We need to do our part to reduce wildfires.

Lets travel with Sage to the summer rangeland and learn more about wildland fires.

**Spin the WILDFIRE WHEEL,  
what was the cause of your wildfire?**

Could the wildfire have been prevented?  
If so, how?

Plants are food for animals to eat. In a fire, plants are fuel. How do you think grazing rangeland with livestock can help reduce the risk of fire?
